

Longevity Health Earns 5-Star CMS Ratings Across Portfolio for Second Consecutive Year

PALM BEACH GARDENS, Fla., [October, 13, 2026 /PRNewswire/ -- Longevity Health announced today that all five of its eligible health plans (Longevity Health of Illinois, Florida, Michigan, New Jersey and North Carolina) earned an overall 5-Star rating from the Centers for Medicare & Medicaid Services (CMS) for 2027, the highest rating awarded by CMS.

Of the 508 Medicare Advantage plans rated nationally, only 15, or 2.95%, received an overall 5-Star rating. Longevity Health represents five of those 15 plans, accounting for one-third of all 5-Star health plans nationwide. Longevity Health also accounts for three of the six plans nationwide that have earned 5 Stars for two consecutive years.

Together, these results place Longevity among a very small group of organizations to achieve 5 Stars across 100% of their eligible plans, underscoring the consistency of its quality performance across multiple states.

"A second consecutive year of 5-Star performance across every eligible plan demonstrates that exceptional quality is not a one-time result at Longevity. It is a standard our teams and partners work together to sustain," said Ben Lerer, Chief Executive Officer, Longevity Health. *"This recognition reflects the dedication of our employees, the strength of our specialized clinical model and our shared commitment with long-term care and provider partners to improving care and quality of life for the people we serve."*

CMS publishes Star Ratings annually to help Medicare beneficiaries and their caregivers evaluate health and prescription drug plans. The ratings assess performance across areas such as clinical outcomes, member experience, access to care, medication safety and customer service. Medicare Advantage contracts may be evaluated on as many as 43 quality and performance measures.

"Achieving this level of performance across all of our eligible plans requires tremendous focus and consistency," said Cara Broich, Vice President of Clinical Quality, Longevity Health. *"Our clinicians, health plan teams and partners work together to coordinate care, identify needs early and support members through some of the most complex moments in their healthcare journeys. These ratings recognize the collective effort behind that work."*

Longevity Health's purpose-built care model combines specialized clinical expertise, proactive care coordination, actionable data and close collaboration to improve outcomes for individuals with complex needs. Its consecutive portfolio-wide top-tier results demonstrate Longevity's ability to sustain high-quality, consistent care as the organization grows.

"This is more than a quality milestone," Lerer added. "It demonstrates that a highly specialized, collaborative model can deliver exceptional performance consistently and at scale."

About Longevity Health

Longevity Health is a leading clinical services company and national Institutional Special Needs Plan (I-SNP) dedicated to improving care and outcomes for individuals living in senior care settings. Through its own health plans, Accountable Care Organization (ACO) model and Independent Provider Association (IPA) partnerships with leading national health insurers, Longevity delivers comprehensive, patient-centered care that addresses the full spectrum of individuals' medical, social and emotional needs. By partnering closely with skilled nursing facilities and providers, Longevity improves outcomes, enhances the care experience and advances value-based care. The organization currently operates in 16 states across the nation.
